Connie Smith-Long Line Of Heartaches

By Brian Clough

In his autobiography George Jones cited Connie Smith as his favourite female singer.

Elvis had a whole collection of her albums at his Graceland home.

Such was, and still is the popularity of the lady with one of the cleanest, purest voices to come out of Nashville that it is no wonder that after an absence of fifteen years she now delivers a brand new album which is only her second since 1978.

It is released here in Britain on August 22nd and will be an instant addition to the collection s of her many fans.

Released on the SugarHill record label it is Connie Smith at her authentic best, with her distinctive vocal styling and sounds recreated from the halycons days of her very first hit 'Once A Day'.

Containing an across the board mix of songs from lost love, through heartache to happiness, the twelve tracks cover all the aspects of traditional country music.

Ironically the album produced by husband Marty Stuart was recorded in the world famous RCA Victor Studio B in Nashville where she recorded most of her hits when she started her career.

It's great to know that from the early years when she had an accident and was given a guitar to play while recuperating, Connie Smith has stood the test of time and is a force to be reckoned with in this modern day of conveyor belt contemporary country music.

Her voice and choice of music is still as good as ever, and hopefully this is another step nearer to her producing more albums in the future.

Hear three tracks from her album on this weeks American Connection show here on Saturday.
